

UK Gender Pay Results: CMR Surgical

UK Gender Pay Results: CMR Surgical

Introduction

CMR Surgical has a vision to transform surgery globally, making minimal access surgery (MAS) available to everyone who could benefit.

From an initial team of just a handful of passionate, experienced individuals, we now employ more than 1,000 highly skilled employees worldwide, including 645 in Cambridge, UK.

The values of the company have been pivotal to our growth and are very much at the heart of CMR's decision making, as well as its talent development programme. These values are: **people focused, ambitious, humble** and **fair & responsible**.

Creating an environment at CMR that enables all of our employees to thrive and to achieve their full potential with us is critical to the success of CMR – and getting our pay and benefits right is a key part of this.

Since our last report, we have made progress in reducing our gender pay gap. While we recognise there is still more work to be done, we are committed to a number of initiatives to help us achieve this fully and make CMR a fantastic place to work.

The data in this report is just for our UK workforce.

UK Gender Pay Results: CMR Surgical

Our UK gender pay results

The gender pay report is based on data for UK employees as of 5 April 2022 [645 people].

CMR Surgical in the UK employs 645 employees, 446 men and 199 women (as of 5 April 2022).

CMR Surgical	2022 Data to Report	2021 Data	2020 Data	2019 Data

The terms

- The **mean gender pay gap** is the difference in the average hourly pay received by all men and women at all levels, including, as applicable, overtime, premium payments, car allowance and bonus.
- The **median gender pay gap** is the difference in midpoints of the ranges of men's and women's hourly pay.
- The **mean gender bonus gap** is the difference in the average bonus pay paid to men and women.
- The **median gender bonus gap** is the difference in midpoints of the ranges in bonus paid to men and women.
- The **bonus pay received** is the percentage of men and women receiving a bonus.
- Gender pay gap is not equal pay, which is a legal obligation whereby men and women are paid the same for carrying out comparable work. The gender pay gap refers to the difference between overall pay (including bonus) received by men and women at all levels across the organisation.

Behind the numbers

- Our 2022 figures highlight that there have been positive improvements as we continue to narrow the pay and bonus gaps. Notably, our mean pay gap has reduced by nearly 10% since we commenced reporting in 2019, and the median has reduced by 11.60% in the same period.
- We have recruited more women into senior level positions. In 2019, the percentage of women in the upper income quartile was 14.30%, which we've now increased by 10% since reporting began to 24.39%. These roles have been across a variety of functions including Medical Affairs, Technology, Quality Assurance & Regulatory Assurance, Finance & Corporate Services, and Commercial.
- We have steadily worked to reduce the gaps within both the upper and lower income quartiles, having reduced the percentage of women in the lowest income quartile by 9.46% since reporting began.
- While this is a step in the right direction, we recognise that there are still improvements to be made. As we've continued to scale up and commercialise in new markets, we have attracted more women into leadership positions, including within our new European leadership structure.
- Some of our critical disciplines, including engineering and technology, are still male dominated fields. There may not be a 'quick fix' solution to this; however, we are actively trying to broaden the appeal of these roles through our resourcing efforts by reviewing where we are posting our job adverts, as well as reviewing our recruitment agency suppliers to help us attract both male and female talent.
- We are continuing to invest in our training & development programmes to ensure that we are helping our current staff develop in their careers to become leaders of the future.

Our commitments – what have we done to date?

We are actively working on several commitments to make sure CMR can close the gender pay gap, and is a rewarding place to work for all staff. We have made good progress with these commitments to date, by:

- Introducing a new, structured and transparent bonus policy which has been benchmarked against competitors. This refreshed policy will increase the earning capability for the majority of employees within the business demonstrated by a significant percentage of men and women getting bonuses.
- We have appointed a Head of Talent role in the People team. The individual has helped to develop and launch leadership development programmes across our organisation to help ensure every employee at CMR has the tools they need to progress.
- We have overhauled our global leave policies, including our parental leave policy, providing full full pay for 26 weeks for new mothers or primary caregivers, and 6 weeks of fully-paid parental leave for fathers (or secondary caregivers).
- This is in addition to further health and wellbeing leave policies, that cover live events such as fertility cycles, menopause, gender reassignment and pregnancy loss to support employee wellbeing.
- We have implemented a global leadership training programme to help build the leaders of the future within CMR. We have a number of great managers in the business with diverse backgrounds and experiences, who we hope will develop and become part of our leadership team in the future.
- As part of our commitment to making CMR a great place to work, we recognise many of our staff have found home working beneficial for their work-life balance. We have taken this on board and implemented new flexible working guidelines.
- Annual employee engagement and diversity, inclusion & belonging surveys have now been rolled out with encouraging results. Moving forwards, diversity and inclusion will be central to these to ensure we are listening and responding to feedback on how we are doing from staff from across the business, at all levels and in every function.
- We have introduced employee resource groups (ERGs) across CMR covering gender equality, disability, ethnicity, social mobility and LGBTQIA + inclusivity to allow our people to champion meaningful change within the organisation.

Our next steps

As a fast-growing business, we fully recognise the importance of a diverse, motivated team to help us achieve our ambitions, and we know there is more that we can do to improve this.

In addition to progressing with our company commitments, our next steps will be to:

- Create tailored, individual personal development plans to support our talented people to progress in their careers at CMR.
- Review our recruitment materials to ensure we are attracting a diverse pool of candidates.
- Examine how we can improve our diversity beyond gender, with input from our people via our ERGs.

An open and transparent culture is vitally important at CMR and we will continue to keep our staff updated on our progress with these commitments throughout the year at company meetings, where questions are encouraged.
